How to Organize
CIVILIAN PROTECTION
in Your Community

OFFICE OF CIVILIAN DEFENSE, WASHINGTON, D. C.

Purpose

The basic purpose of a local organization for civilian protection is to provide a passive defense against enemy air raids. The organization also provides a means of dealing with active sabotage by enemy agents.

Enemy Objectives

The objects of an enemy air raid upon a city are:

1. To destroy or cripple defense production activities.
2. To disorganize communication and transportation.
3. To break down the morale of the civilian population by fire, destruction, and casualties.

The Antidote—Passive Defense

The enemy can be frustrated in large measure by proper organization and training, to—

1. Control the movements of the population during a raid.
2. Direct the public to maximum shelter available and instruct them in taking cover.
3. Promptly repair broken mains, power, and gas lines.
4. Reopen streets and restore communications.
5. Extinguish incendiary fires before they start conflagrations.
6. Rescue persons trapped in demolished houses.
7. Render prompt first aid and hospitalization of wounded.
8. Provide food and shelter for those made homeless.

Organization and specialized training of a large group of volunteers are necessary to accomplish passive defense. This book tells you how to organize it.

Basis of Organization

The basis of organization should be, as far as practicable, the existing municipal government, under the guidance of the State Defense Council.

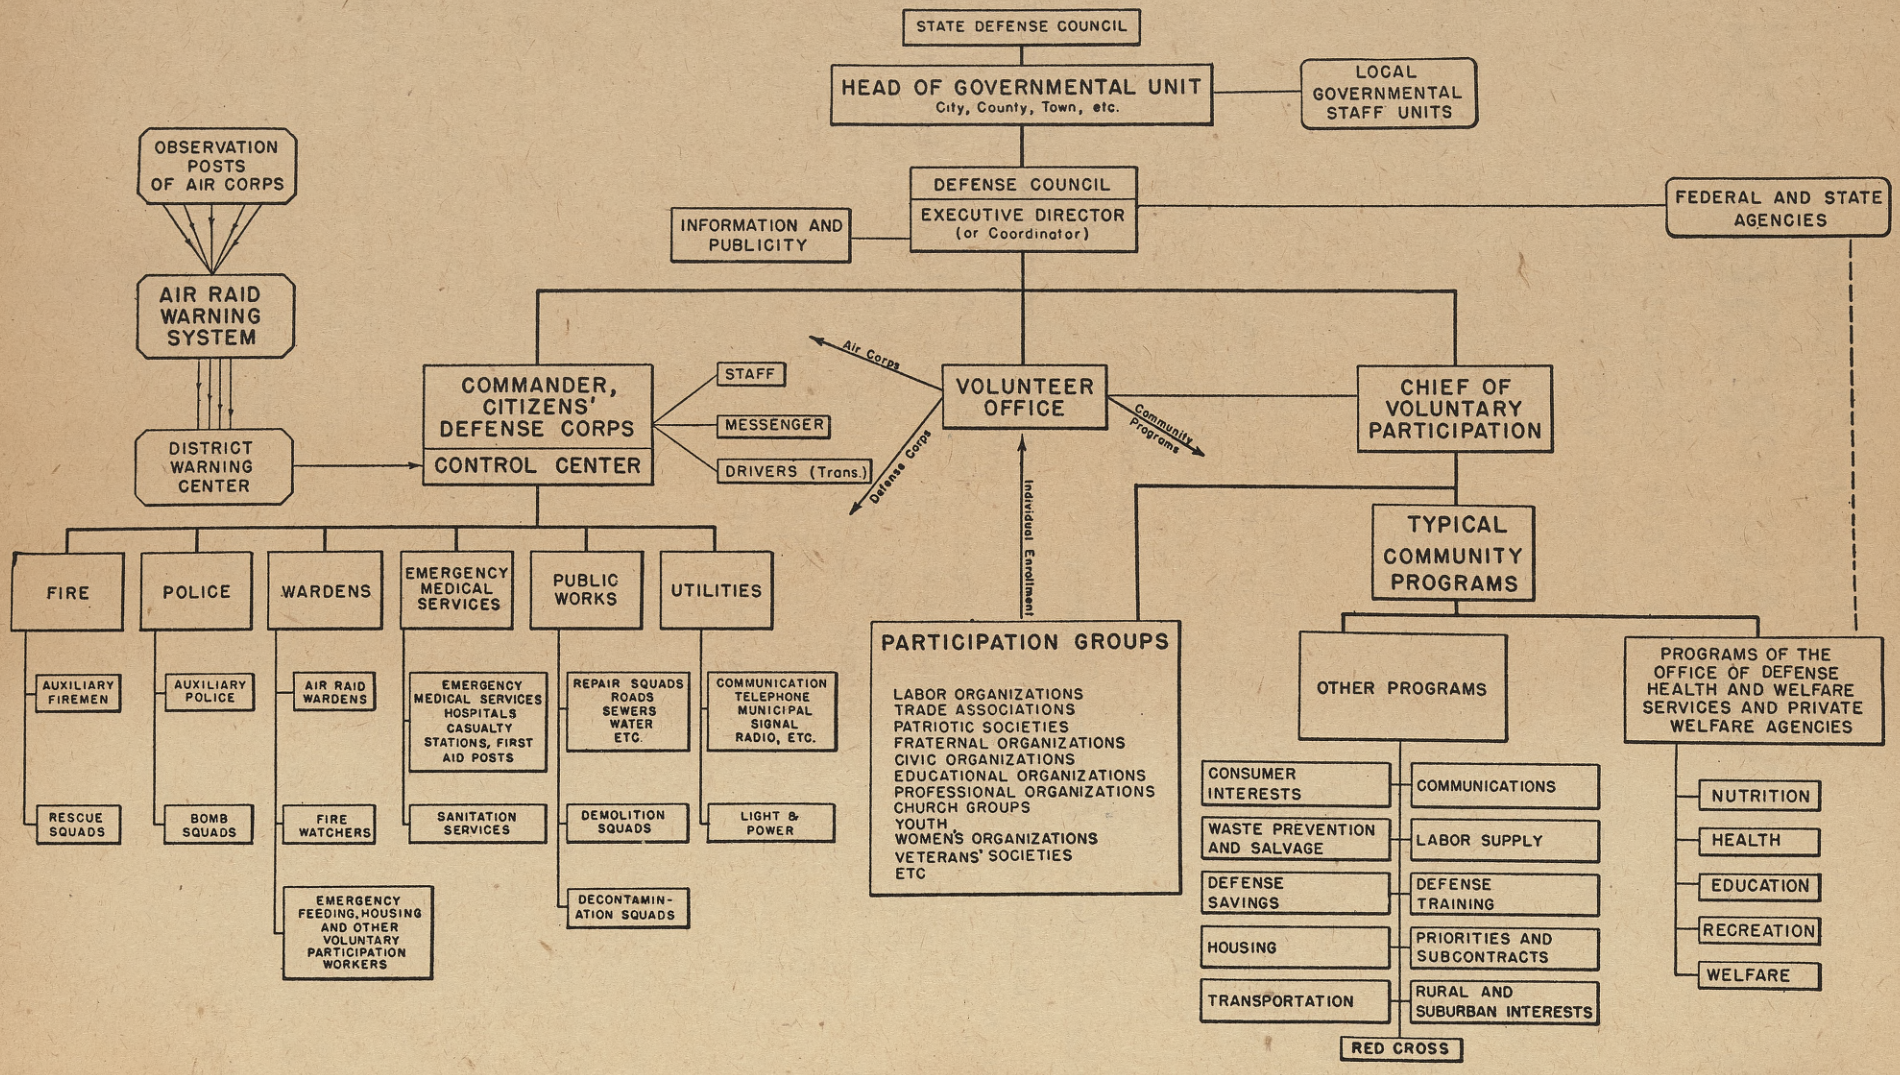
In addition to the Departments of Police, Fire, and Public Works, shown on the chart, it is possible to organize the Emergency Medical Services under the Department of Health in some instances. The Department of Education should be represented on the Defense Council to organize training facilities. The Department of Welfare may be given supervision of Emergency Food and Housing Volunteers, or of private organizations conducting that work.

Whether volunteers should be made part of an existing municipal department or formed into an independent, associated corps will be determined by—

1. Existing municipal facilities.
2. Study of the problem.

SUGGESTED LOCAL CIVILIAN DEFENSE ORGANIZATION

OCTOBER 20, 1941



A TIMETABLE OF CIVILIAN PROTECTION

The following is a check list of steps to be taken in organization. Doubtless your community has already taken many of them. Now is the time to check and see that you have taken all those necessary.

Sound organization is without exception based upon careful study of the job to be done.

It is unwise to enroll volunteers until you have an organization to which to assign them, and a training plan and material for their instruction.

To stage a "blackout" before you have proper equipment and trained personnel to handle matters creates confusion and gives wrong impressions difficult to correct.

"First things first" is a good rule. The following timetable is offered as a guide to organization procedure. The time span for each phase should be determined and set locally.

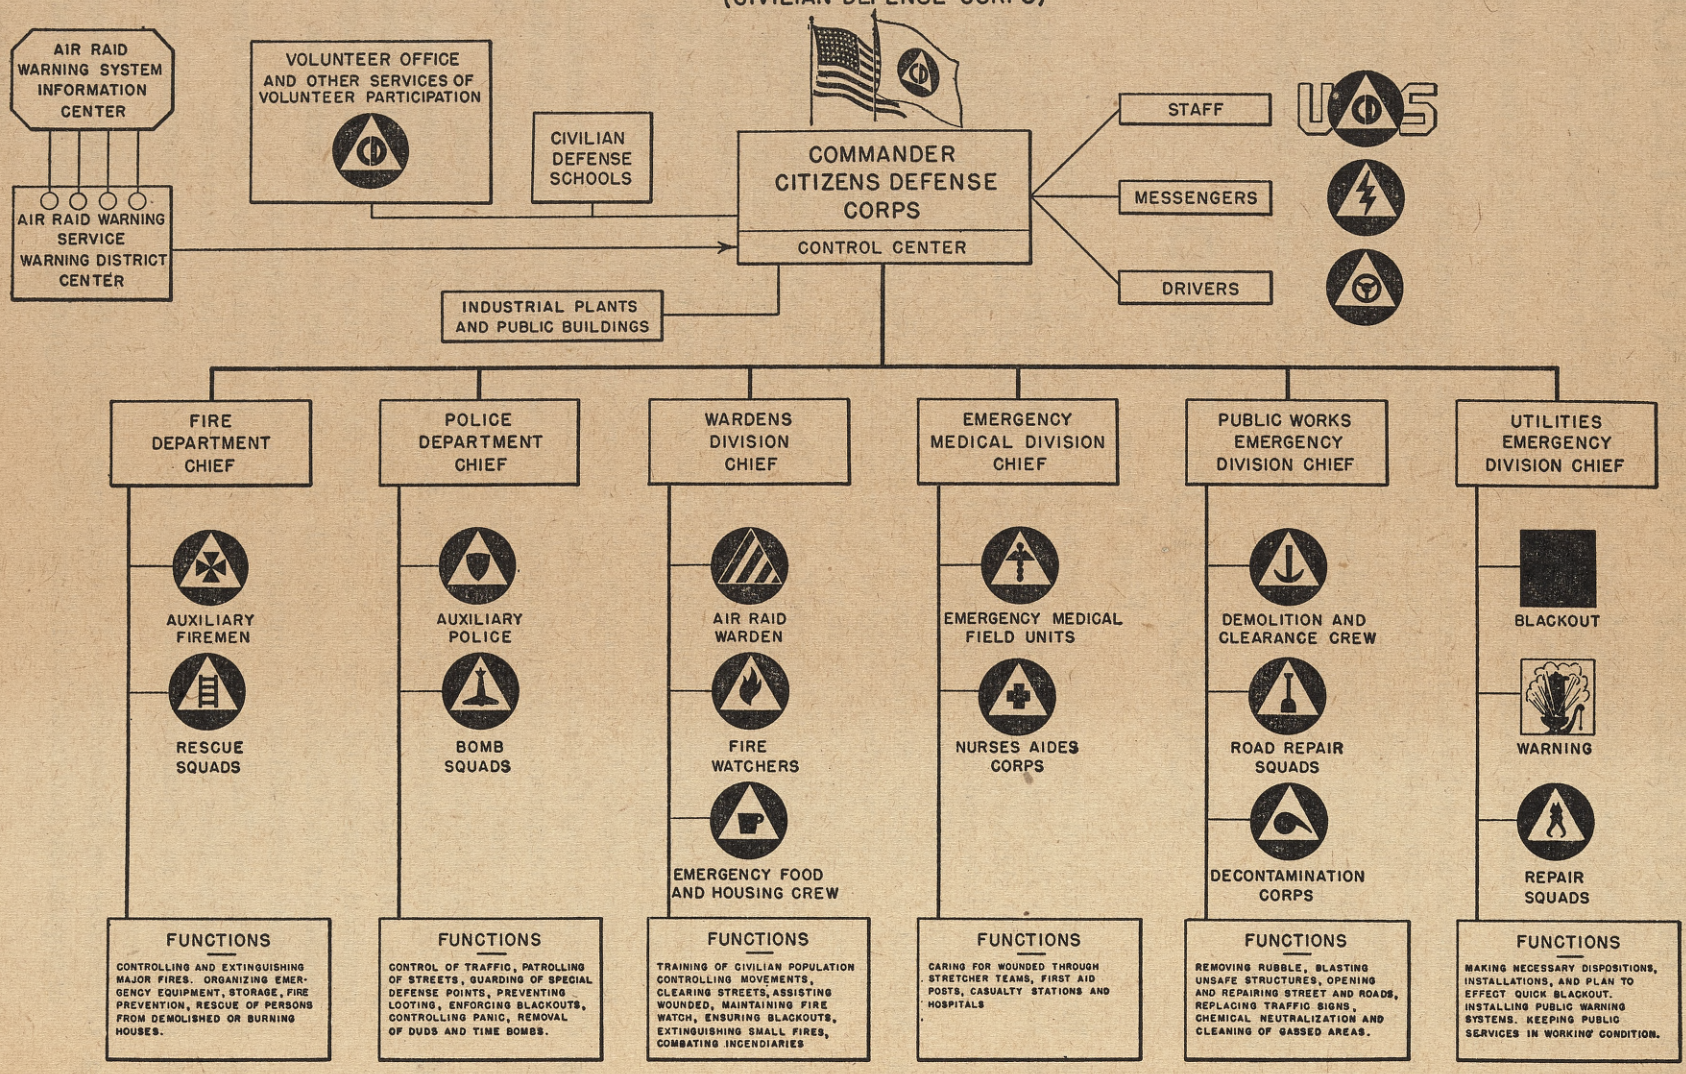
FOUNDATION PERIOD

First Phase

1. Proclamation of emergency, if necessary to authorize further steps.
2. Appoint a *Defense Council* to study and develop a defense plan. The Defense Council should be composed of representatives of principal civic groups and associations, and should include representatives of the city departments, local industry, public services, and hospitals.
3. Appoint a defense coordinator, a commander of the citizens' defense corps, a chief air raid warden, a chief of emergency medical services, and committees necessary to carry out the steps enumerated below.
4. *Commander of Citizens' Defense Corps.*—To draw up complete organization plan for civilian protection, including place of existing city departments and functions; organization and assignment of demolition and clearance crews, road repair crews, and decontamination squads with necessary personnel; organization of Feeding and Housing Services with necessary personnel; staff organization and personnel needed for messengers and drivers' corps.
5. *Communications Committee.*—To analyze and map all existing communications systems (telephone, telegraph, police, fire, radio, etc.) to determine location of control center; to list auxiliary equipment needed; to confer with Air Raid Warning System officials on warning methods. To submit report.
6. *Fire Defense Committee.*—To work under fire chief. To develop emergency fire plan, determine location of auxiliary stations, water storage and equipment required, number of men to be enrolled for auxiliary firemen. To designate candidates for Civilian Defense School. To confer with local industries. To estimate personnel and equipment needed for rescue squads.
7. *Committee on Blackout and Camouflage,* including industrial representation to survey facilities and equipment and formulate a plan of operation.
8. *Committee on Transportation.*—To survey facilities and suggest emergency organization.
9. *Committee on Evacuation.*—To determine racial, religious, and age components of population and confer with State authorities regarding emergency evacuation.

CIVILIAN PROTECTION ORGANIZATION FOR A MUNICIPALITY

(CIVILIAN DEFENSE CORPS)



10. *Utilities Committee.*—To survey facilities and submit recommendations for emergency repair organizations; installation of Public Warning System; installation of stand-by power plants, emergency lines, and other needed new facilities.
11. *Volunteer Office Committee.*—To set up volunteer office and survey all local organizations, also to determine defense activities aside from those of the Citizens' Defense Corps.
12. *Budget Committee.*—To determine special defense expenditures needs and provide appropriate legislation or other action to secure funds or equipment.
13. *Public Relations Committee.*—To draw up plans for publicity campaign.
14. *Chief of Police* (or corresponding authority).—To determine auxiliaries needed, outline duties and designate candidates for training at Civilian Defense Schools.
15. *Chief Air Raid Warden,* with necessary staff to determine sectors and locations of warden's posts. To determine zones, precincts, and sectors, as well as the number of wardens and equipment needed.
16. *Committee on Training.*—To determine location of schools for training, designate instructors, and arrange for special training. To include representation from Board of Education, Fire, and Police Departments.

Medical Advisory Council.—Representing health department, medical society, hospitals, nursing, Red Cross, etc., to assist and advise the Chief of Emergency Medical Services.

Chief of Emergency Medical Services.—To survey medical facilities, including personnel, to coordinate these facilities in organizing a Field Casualty Service and to assist the Red Cross in first aid and Volunteer Nurses' Aide training as described in Medical Division Bulletin No. 1 and No. 2.

All of the above committees and services can work at the same time. Their work can be greatly accelerated but the data and plans they develop are essential to sound organization.

ORGANIZATION PERIOD

Second Phase

1. Adopt and proclaim the defense organization. (Citizens' Defense Corps of.....)
2. Organize local training schools and send selected instructors for special courses at Civilian Defense Schools and other selected defense schools.
3. Compile materiél requirements (fire apparatus, alarm equipment, auxiliary power plants, shelter construction) and submit budget for purchase or requisition.
4. Place orders for needed materiél.
5. Revise and improve city (or defense area) map.
6. Enroll volunteers for service.
7. Study evacuation plans in connection with State and regional committees.
8. Start installations if necessary materials are available (telephone, etc.).
9. Organize publicity and start releases.

CIVILIAN PROTECTION ORGANIZATION FOR A MUNICIPALITY

ENROLLED WORKERS GROUPS, ASSIGNMENTS, DUTIES, AND TRAININGS

ADMINISTRATIVE GROUP		CORPS OR SERVICE	No. Per 1000 POP.	DUTIES	REQUIRED HOURS IN TRAINING COURSES: 1ST AID	FIRE DEFENSE	GAS DEFENSE	GENERAL	DRILL	UNIFORM EQUIPMENT	PROTECTIVE CLOTHING	OPERATING UNIT	SIZE OF OPERATING UNIT	EQUIPMENT OF OPERATING UNIT

		ROAD REPAIR	2-4	FILL HOLES, LEVEL ROAD SURFACE, APPLY TOP DRESSING, RESTORE SIGNS.	0	3	2	5	2	ARM BAND	NONE	TRUCK COMPANY	4-16	1-4 TRUCKS, ROAD TOOLS, RESURFACER, PAINTS, CARPENTER'S TOOLS.
		DECONTAMINATION SQUADS	1-2	CHEMICALLY NEUTRALIZE AND WASH OFF PERSISTENT GAS, WALLS AND STREETS. DECONTAMINATE CLOTHING AND EQUIPMENT.	10	0	5	5	2	ARM BAND	CIVILIAN GASPROOF CLOTHING, DUTY MASKS	SPRAY TRUCK UNIT	4-6	WATER TANK, FLUSHER, CHLORIDE OF LIME, BRUSHES, SHOVELS, ETC.

TRAINING PERIOD

Third Phase

1. School training of enrolled volunteers.
2. Assignment of graduates to units and group training. Issue equipment, and train in its use.
3. Complete communications unit and control center.
4. Complete installation of air raid warning signals.
5. Complete installations, as far as planned, of emergency fire installations (water storage, auxiliary fire stations, fire buckets and pumps, etc.).
6. Complete organization of air raid warden's posts.
7. Complete medical organization and select sites for casualty stations.
8. Equip and organize rescue squads, drivers' corps, and messenger service.
9. *Test* Staff functioning by field drills.
10. Complete evacuation plans.
11. Complete installation of extra equipment, line, etc., as planned, of utilities.
12. Adopt procedure for blackout.
13. Install necessary equipment for blackouts in public buildings and industrial plants.
14. Continue publicity and alert public to coming test.
15. Check up individually on all services and functions.
16. Initiate training of public in individual home precautions.

TEST PERIOD

Fourth Phase

1. Test operations of air raid warning system.
2. Test operation of each service or corps separately.
3. Retest staff functions by drills.
4. Test daylight coordination of all elements and correct deficiencies.
5. Test blackout.
6. Coordinate tests of all elements in blackout and correct deficiencies.
7. Weed out inefficient personnel.
8. Retest all elements in conjunction with simulated air raid exercises by air corps.

ALERT PERIOD

Fifth Phase

NOTE.—If imminent danger of air raid, decrease intervals in tests and inspections.

1. Hold monthly inspections of equipment, clothing.
2. Continuing inspection of warden's posts, auxiliary fire stations, casualty station sites, etc.
3. Repeat general alarm test in cooperation with Army command.
4. Continue education of public and morale building.
5. Strive to complete equipment, improve organization, and create perfect teamwork.

Publications of the Office of Civilian Defense

Order through State Council. Individual copies for sale by the Superintendent of Public Documents

PLANNING GUIDES (for distribution to staff executives and appropriate committees).

From two to fifteen copies will usually be sufficient for a local defense council and quantities ordered for printing are estimated with a view to such limited distribution. Planning Guides are uniformly 8" x 10½".

1. How to organize civilian protection in your community.
2. An Atlas of Civilian Protection. (In preparation.)
3. Emergency Medical Service for Civilian Defense, Medical Bulletin No. 1.
4. Equipment and Operation of Emergency Medical Field Units, Medical Bulletin No. 2.
5. Protection of Industrial Plants and Public Buildings.
6. The Citizens' Defense Corps. Insignia and Paraphernalia.
7. Blackouts.
8. Air Raid Warning System.
9. The Volunteer Office (how to organize it).
10. Control Systems.
11. Protection of Hospitals.
12. Protection of School Children and School Property.
13. Volunteers in Health, Medical Care, and Nursing.
14. Volunteers in Recreation (in preparation).
15. Volunteers in Family Security (in preparation).
16. Manual of Physical Fitness (in preparation).

MEMORANDA (for use of technical personnel).

To provide engineers and executives with current data on new devices or schemes, memoranda are issued as material is available. Usually not more than five or ten copies are needed for a local Defense Council. The size of memoranda is 8" x 10½".

1. Municipal Signaling Systems.
2. Bomb Tests on Materials and Structures.
3. Glass and Glass Substitutes.

TEXTBOOKS (for technical personnel and instructors).

This series of publications, 6" x 9" in size, is intended for the use of instructors and of enrolled volunteers while training. It is not intended that students retain their copies.

1. Protection Against Gas.
2. Fire Protection.
3. First Aid in the Prevention and Treatment of Chemical Casualties.
4. Protective Concealment.
5. Simple Shelters (in preparation by War Department).

LECTURES (for instructors).

From talks given before classes at the Civilian Defense Schools and stenotyped, the best material has been selected, edited, and reproduced on loose-leaf 6" x 9" sheets in large type suitable for the lecturer. No more than two sets per local training school should be required. Lectures should not be ordered for distribution to the students.

1. General Subjects Group.
2. Incendiary Defense Groups.
3. Gas Defense Group.

TRAINING GUIDES (for instructors).

These publications outline the group-training plan in detail and are for the use of the school staff in laying out courses, arranging for qualified instructors, and selecting texts. Five to ten copies of each should serve the needs of the local Defense Council. They are 8" x 10½" in size.

Contents.

1. Training Courses for Civilian Protection.
   - Organization of Schools.
   - Requirements for Federal Recognition.
   - Basic Training Courses.
   - Discussion of Basic Courses.
   - Advanced Training for "First Class" Rating.
   - Summary of Training Requirements.
   - How to Get Insignia.
   - Graduations and Awards.
   - Books Useful in Training.
2. A Training Guide for Volunteer Nurses' Aides.
3. Training Auxiliary Firemen.
4. First Aid Course for Civilian Defense.
5. Advanced First Aid for Civilian Defense.
6. A Training Guide for Bomb Squads (in preparation).
7. Staff Manual.

HANDBOOKS (for individual issue to enrolled volunteers).

This series of publications, 4" x 7½" in size, is designed for the use of the individual enrolled worker. Each volunteer will require a handbook, but it is not necessary to provide other publications for his use. Each local Defense Council should requisition sufficient handbooks for the volunteers in each enrolled group, plus a 20-percent reserve for replacement. Quantities needed should be carefully computed.

1. Handbook for Air Raid Wardens.
2. Handbook for Auxiliary Firemen.
3. Handbook for Auxiliary Police.
4. Handbook of First Aid.
5. Handbook for Rescue Squad Leaders.
6. Handbook for Decontamination Squads.
7. Handbook for Emergency Feeding and Housing Corps (in preparation).
8. Handbook for Messengers.
9. Handbook for Drivers.
10. Handbook for Bomb Squads (in preparation).
11. Handbook for Fire Watchers.
12. Citizens' Defense Corps Staff Manual.
13. Handbook for Road Repair Crews.
14. Handbook for Demolition and Clearance Crews.

1

The Stanford School has been moved to Eureka for the present week at the suggestion of Maj Gen Walter K. Wilson, Commanding General of the Northern Calif. section of the Western Defense Command. General Wilson visited here last week and expressed the opinion that this

area is very vulnerable to enemy attack and that the Civilian Protective Services should be increased in manpower, more thoroughly trained and completely organized as soon as possible. Classes are being held for 50 students, selected from the personnel of the several Community Defense Corps, and from the larger lumber mills and

3 defense plants in the County.
Because much of the course of study covers restricted military information the school is restricted to just those who are certified by the Commander of their local Defense Corps.

Col. Thomas H. McHatton Director of the School will give a public address on the subject of the Protective Services

4

of Civilian Defense at the Junior High School Auditorium, Thursday May 20th at 8 p.m., to which the public is invited and urged to attend.

COUNTY ALERT SYSTEM

INSTRUCTIONS FOR GIVING AND RECEIVING PERSONNEL CALLS

When we receive a YELLOW ALERT warning from the Army, or when we initiate a PRACTICE YELLOW ALERT, a number of the key personnel in each community is given warning by telephone.

The person placing these calls should always use the standard wording that we have adopted, a sample of which follows:

"DEFENSE COUNCIL CALLING! PRACTICE YELLOW ALERT! ANSWER PLEASE!"

The person receiving the call should reply in this manner:

"PRACTICE YELLOW ALERT, O. K! BROWN SPEAKING!"

Notice that the answer repeats the warning message first, followed by "O. K!", then the name of the person receiving the call. The use of this standard wording is important to assure the person placing the calls that they are being received by the proper parties.

Each person on the Call List should explain the call system to anyone who may answer the phone in their absence, so that the calls will be properly answered. Because speed is essential in the placing of these calls, the person answering the phone should take the message and relay it if the party called is not on the phone.

INSTRUCTIONS FOR ALERT AND DUTY SERVICE

HUMBOLDT COUNTY CONTROL CENTER

If you are ON DUTY, you telephone the ALERT CALL LIST in the event of an ALERT.

If you are ON ALERT, you telephone the PERSONNEL CALL LIST.

DUTY

If you are ON DUTY, the person whom you are relieving will call to notify you that they are going off duty and that you are to take over. After checking with her, phone the Sheriff's Office, 2212, and say:

"This is _____speaking. I am reporting for Civilian Defense Duty, and am relieving_____."

Should she fail to call you, you should call her and tell her that you are ready to relieve her.

EXCEPTION: If you are serving on the 8:00 to 11:00 shift on Sunday morning, it is only necessary for you to phone the Sheriff's Office. You do not need to check with the person whom you are relieving. You do, however, check with the person who relieves you at 11:00.

At the end of your shift, call the person who is to relieve you and say:

"This is _____speaking. I am going off duty. Will you please notify the Sheriff's Office?"

ALERT

If you are ON ALERT, it is only necessary for you to phone the person who is ON DUTY to let her know that you are ON ALERT. This should be done at the beginning of your shift.

Complete instructions for procedure in the event of an ALERT are given at the top of each CALL LIST.

Each Saturday the Defense Council will call you and advise you of the person whom you are relieving and the one who is to relieve you, as well as the person who is serving with you ON ALERT or ON DUTY, as the case may be.

PERSONNEL CALL LIST

INSTRUCTIONS

Call local operator and say "THIS IS AN AIR RAID WARNING - I have a list of calls to make." (Operator will connect you with the calls on the Personnel Sheet.)

As each call is completed, fill in on report the time and name of person answering call.

Your message on each call is as follows:-

YELLOW signal from Sheriff - "DEFENSE COUNCIL CALLING! YELLOW ALERT! ANSWER PLEASE!"

BLUE signal from Sheriff - "DEFENSE COUNCIL CALLING! BLUE WARNING! ANSWER PLEASE!"

RED signal from Sheriff - "DEFENSE COUNCIL CALLING! BLACKOUT! (if at night) "AIR RAID!" (if daylight) ANSWER PLEASE!"

WHITE signal from Sheriff - "DEFENSE COUNCIL CALLING! ALL CLEAR! ANSWER PLEASE!"

HUMBOLDT COUNTY CONTROL CENTER

O ne of the functions of military leadership is to figure all possible methods and means that might be utilized by the enemy at any given time to obtain their objective and to plan defensive measures accordingly. The Western Defense Command, charged with the protection of the Pacific Coast area, is in better position to know the overall military situation and to figure what to expect than we are so it is just good business for us to accept and follow their thinking on the subject, in forming our plans for Civilian Defense.

First-Our military very definitely believes that one or more attacks will be attempted on the Pacific Coast by Japan this year-Where? Depending on the size of the sea-borne force that they can muster and spare for the job. If a large one, probably the attack would be attempted on one of the large production and shipping centers. If too small to combat the military protective services of those areas, they will hit a less important area, such as ours; depending upon the psychological effect on their own as a reward for the effort-When? No telling. But probably when our attention is diverted by heavy action elsewhere in the Pacific.

The military believes that no prolonged air attack can be made on us, unless Japan is first successful in establishing land bases in Alaska or elsewhere, from where land-based planes could operate.

If we are to follow our military thinking, then the possible types of attack we may be subjected to, as long as the present situation holds, are-

1. Submarine shelling.
2. Light submarine-borne planes, with incendiaries. (probably the so-called "Phosphorus calling cards")
3. Small Commando raids.
4. Landing in force to take over a poorly protected section of the coast with an airport if possible.
5. Carrier-borne air attack.
6. Shelling by warships.
7. Landing of Saboteurs
8. Any combination of above or all of them.

PLANS OF PROTECTION TO MEET THESE POSSIBILITIES

I. SUBMARINE SHELLING has taken place on at least two occasions on the Pacific Coast with little damage being done. Because of the military protection given the more important points on the coast of Humboldt County it isn't likely that any such attack would do any great amount of damage.

2. SUBMARINE-BORNE PLANES WITH INCENDIARIES is a real threat; particularly in the dry season when thousands of acres of our back country could be set afire simultaneously by sending two or three planes over it, dropping phosphorous impregnated cards, that will ignite in warm weather as soon as they dry out. T he damage to property and live stock would be tremendous, as well as the possible loss of life due to people being trapped in the fire areas. The protection necessary to contend with this situation requires the quick organization of personnel and fire fighting equipment to supplement our organized Federal and State Forestry Departments--traffic control-emergency feeding or canteen service--rescue and evacuation service to remove residents from threatened areas and temporary housing, clothing and feeding for these people-Also registration and information service, and Emergency Medical Services.

3. SMALL COMMANDO RAIDS, either surface or submarine-borne could be effected at many points along our coast line. We will have to depend on our military forces to take care of them but civilian protection services would be called out to fight fires, repair highways, bridges and communication lines, and provide medical aid for military and civilian casualties.

4. LANDING IN FORCE. The Japs will not soon forget what our Marines did at Guadalcanal and with the airbase at McKinley-ville as the objective, might attempt to land in force and take it over. A very few planes with well placed bombs could effectively cut off Humboldt County from land reinforcement for several days or possibly weeks, and with a considerable airforce using carriers off shore and the land base at McKinleyville they could get in some telling blows at our production and shipping centers along the coast. It sounds like suicide for them, but they place no value on human life and will probably take some long chances to accomplish some destruction of property and lives on American soil to produce the desired effect on their home front. Such an attack would call for the complete mobilization of all elements of Civilian Defense on a 24 hour basis in every community in the county. Probably evacuation of certain areas would be requested by the military, and certainly several communities would be subjected to bombings and shelling. It is conceivable that such an attack would be started by a very heavy bombing in the Humboldt Bay area to disrupt communications and create panic that would plug the highways to retard resident military movement.

5. CARRIER-BORNE AIR ATTACK. Our off-shore fog bank, at times makes a perfect set up for one or more enemy carriers to hide in the western edge of it, one, two or three hundred miles off shore, send their planes in to drop their eggs while they head west out of fog to pick up the planes on their return, then duck back into the fog again to evade detection or destruction by our air force. This is the type of attack on which most of our Civilian Protection thinking in the past

has been based, and rightly so, for at certain times of the year (better known to the Japs than to us) they could raid us in this manner and get away with little or no loss. The military believes that, in this section of the country, particularly because of the number of lumber mills as principal targets, they will use a large percentage of incendiaries followed with a few H. E. bombs to scatter the fires out of control. Also they will use gas to help demoralize the fire fighting facilities. We are all familiar with the training and drill of the necessary protective services to meet this situation.

6. SHELLING BY WARSHIPS would probably come only in conjunction with Landing in Force or possibly with Commando raids, both of which have been covered heretofore. With the present situation in the Pacific area it is doubtful that any effective shelling alone by warships could be accomplished.

7. LANDING OF SABOTEURS: A landing of saboteurs from a submarine may be attempted, and if they are successful in evading our Coast Guard Patrol, our entire personnel may be called upon by the F. B. I. to help locate them. They would not likely be Japanese, probably Germans or Finns, possibly former residents of the county with friends or relatives here who would be put on the spot to give them cover and take care of them. By Presidential Directive, the Federal Bureau of Investigation has been vested with the responsibility of apprehending saboteurs landed on our shores. These saboteurs may land from a submarine or descend via parachute, or land in some other unexpected manner. If detected and surrounded in some area of the County, the available auxiliary Police forces may be called upon to help guard the area and to keep inquisitive people out of the way of the F. B. I.'s operation of rounding them up.

8. Any or all of the above methods of attack could be used simultaneously, and, if seasonable, very effectively on the Pacific Coast and upon Humboldt County in particular.

Now to consider the possible forms of attack in relation to the protective services to be activated by the County Control Center.

1. Submarine shelling would probably take place in an unincorporated area and we would be required to muster necessary aid from the nearest community.

2. The problem of forest and rural fires is definitely in our lap. We will have to muster Forest Fire Fighting Equipment and personnel, Emergency Medical Services, the Red Cross services, traffic control and county and state police.

3. Commando raids - We will be called upon to muster necessary Emergency Medical Services, repair crews for Communications, Public Services, Highways, etc., and possible help in fire fighting and traffic control in rural areas.

4. Landing in force will call for complete manning of control center on 24 hour basis.

5. Air attack - threatened or real - same as 4.

7. Landing of Saboteurs would call for the activation of all the County Police Protection Services and possibly the Auxiliary Police personnel of one or more communities.

Duties of the personnel of the County Control Center Staff -

Services:
- Fire Protection
- Police Protection
- Emergency Medical
- Bomb Reconnaissance
- Emergency Welfare
- Transportation and Road and Bridge Repair
- Communications and Messenger Service
- Guard
- Evacuation
- Panel Clerk

FIRE PROTECTION

As there is no County Chief of Fire Fighting Services, at least two Staff members should be thoroughly familiar with the available equipment in the County. They should know the Fire Chiefs in every community that has equipment and the personnel in charge of County and State equipment. They should meet with Chief Glenn or with his assistant, Wm. Siler of the State Forestry Service and outline a definite plan in case of attack #2. They should be thoroughly familiar with the operation of the County Control Panel.

POLICE PROTECTION

The available police protection for countywide use consists of the Sheriff and his staff of deputies and constables and his posse, the State Highway Patrol, and Highway Patrol Auxiliary. One Staff Member should meet with Sheriff Ross, Sergeant Nichols of the Highway Patrol, and Lonnie Hill, Organizer and Commander of the Highway Patrol Auxiliary, to arrive at a definite understanding of a method of handling calls that will come through the Control Center for police protection, traffic control, etc.

EMERGENCY MEDICAL

The Deputy Chief for the County Emergency Medical Services, Mrs. Littlefair, will be at the Control Center to arrange for the loaning of services from one community to another as needed in an emergency. She should have a Staff Member as an assistant, capable of taking over in her absence. He should be familiar with the available ambulance services

and mobile medical units in the county. His detail instructions should come from Dr. Watson or from Mrs. Littlefair.

BOMB RECONNAISSANCE

The County Chief Bomb Reconnaissance Agent should keep an up-to-date list of all agents and observers in the County with their addresses and telephone numbers. He will receive reports of UXB's from Wardens in unincorporated areas or from the Control Center of communities that do not have B. R. Agents on their Staff and will dispatch the nearest available Agent to investigate and report back. All real UXB's in the County will be reported to him and it is his duty to phone the information to the Western Defense Command through the Ninth Regional Office of Civilian Defense. He will deal with the Army Bomb Disposal squad when it arrives.

EMERGENCY WELFARE

The County Chief of Emergency Welfare Services will be in the Control Center to dispatch services as needed in an emergency. He should have a Staff Member as an assistant. These services are better known as the Red Cross Services of Registration and Information, Emergency Feeding, Clothing and Housing, and function through Civilian Defense in any disaster resulting from enemy action. The Staff Member should be familiar with the workings of all the above services, with the stocks of supplies available, where they are located and procedure of disbursing them. Mr. Roche, the County Chief will have to train his assistant because of the complex nature of the Red Cross regulations involved.

TRANSPORTATION AND ROAD AND BRIDGE REPAIR

A chief, and one assitant will be assigned to this Service from the Staff. They will be called upon in an emergency, by the other services to supply transportation for personnel and material. They should have the names of the Chiefs of Transportation of each of the major communities in the county and should have a record of the available facilities in each. They will need a record of the Road and Bridge Repair equipment in the county, the personnel available, the name, address and phone number of the man in charge at each location of this equipment. A plan should be worked out with the County Supervisors and the State Highway Department ~~to facilitate County Supervisors and the State Highway Department~~ to facilitate the dispatching of their equipment and personnel in an emergency.

COMMUNICATIONS & MESSENGER SERVICE

Mr. Nealis, Chief of this Service, will work with Mr. Smullen to develop all possible means of communication to take the place of the telephone in case this service is disrupted. He will have two Staff members as assistants, who will also serve as telephonists in the Control Center. They should be familiar with any emergency communications system developed, know the personnel in charge of it, and where and how to contact them quickly in an emergency. The Control Center needs a small crew of motorcycle messengers and one of the Staff members could be assigned the job by Mr. Nealis of organizing it and having charge of it in an emergency.

CONTROL CENTER GUARD

Three Staff members are assigned to this service. Two should guard the front entrance to the building and challenge anyone attempting to enter. One should guard the basement door and allow no one in. They should all be armed and deputized.

EVACUATION SERVICE

Fred Moore Jr., County Chief of Evacuation will be in the Control Center to direct these services when the Military orders are received for any movement of the population other than one confined to the limits of one community or city, such as moving from one part of the city to another. He will need the help of all the personnel in the Control Center to activate this service for it involves Police protection, E mergency Medical, Emergency Welfare, Transportation and Messenger Service.

PANEL CLERK

One Staff Member will be assigned as Panel Clerk and will act as inside messenger. It is his duty to operate the Panel Board and serve as messenger between the telephonists and the Control table.

xxxxxxxxxxxxxxx

It is not conceivable that we will have very many telephone calls for aid during an emergency but we might have a flood of calls from individuals in the community. All Staff Members in the Control Center should be ready to help the telephonists in such a case.

It must be the first duty of every member of the Control Center Staff to report for duty on the threat or confirmation of any enemy action, or occasion of natural disaster affecting the County, and to stay on duty until relieved by the Commander, or whoever is in charge.

LIST OF APPLICANTS FOR WAR DEPARTMENT CIVILIAN PROTECTION SCHOOL

PART-TIME

1.	Adah Morrison (P. M. only)	Eureka Defense
2.	C. H. Hudson	" "
3.	~~W. D. Brown~~	" "
4.	J. M. Bowersox	" "
5.	Theodore Weissich	" "
